

## Adopt-A-School in \_\_\_\_\_

### Help \_\_\_\_\_ Schools Go Sustainable

Are you aware that \_\_\_\_\_ Public Schools are using polystyrene trays in the lunchroom? That's over \_\_\_\_\_ trays per day for lunch alone! Compostable trays and the kitchen food waste could be composted.

**Every Tray Counts** (ETC) is proud to offer a program for the school lunchroom in \_\_\_\_\_. We will work with your community to introduce our **Kitchen Waste and Tray** program. It replaces polystyrene trays with compostable trays and diverts the kitchen food waste and the trays to a compost site. This is a great opportunity for a business, family, community group, or global citizen to significantly and positively impact our children's education, health and way of life.

### **How Can You Help? Donate the Difference!**

When you donate to ETC's Adopt-A-School fund in \_\_\_\_\_, your dollars will go toward:

- The general fund for schools that lack specific funding.
- Helping a school, or the district, pay the difference in cost between a polystyrene tray and a compostable one.
- Hiring a compost hauler to bring the trays and kitchen waste from the school to a compost facility.

To Adopt-A-School, or to find other ETC programs and information, please e-mail us at **[everytraycounts@gmail.com](mailto:everytraycounts@gmail.com)** or visit us at **[www.everytraycounts.org](http://www.everytraycounts.org)**
